CORPORATE PROFILE

About US

ERBrains IT Solutions Pvt Ltd., is an independent IT consulting firm based in Bangalore India, that provides ERP Services, software development, project management, packaged software, and systems integration services to a variety of organizations both large and small. At ERBrains we believe that the success of your Enterprise Resource Planning software solution begins with choosing a knowledgeable partner. Our expertise extends way beyond the implementation phase of a new solution. We are committed to providing the highest level of quality service to our customers that the owners of ERBrains are “hands on” managers (consultants) of every project.

Our FOCUS

Our focus is to ease our client into a long-term relationship with a business and execution model that aligns with their culture. ERBrains management team is deeply involved in sustaining relationships through the fulfilment of both measurable and intangible expectations. We believe in being a strong partner and 'Steering Progress'.

GP

Sharepoint Consulting

- Publish the Contents with an Out-of-the-box administration for existing framework using SharePoint 2010 as well as 2007.
 - It also offers a complete search engine to search content and a portal for a user including single sign on. Furthermore it has workflows to support business processes and a possibility to have insights into third application data. So if a company want to reuse these possibilities (not only one) SharePoint is the tool which can be used. Additionally it can be enhanced by developers since it has a fantastic API.
If a company can't use the advantages of a platform offering so many things it's of no importance.
 - SharePoint is much efficient, Try it with us to make it even better.
 - Best Services assured all the time.
-
